

GANESH MADAKE

AI/ML Engineer

Objective:

Sr. Software Engineer with 6 years of DevOps and 1+ year of experience in AI/ML, data science, and Generative AI. Strong background in Python development, machine learning, model pipelines, and cloud infrastructure. Proven ability to design scalable MLOps systems, deploy models in production, and build intelligent self-managing systems using agentic AI and AIOps. Hands-on experience with GenAI tools like OpenAI APIs and LLM integration. Actively seeking roles in AI/ML, MLOps, GenAI, and AIOps to bridge the gap between engineering, intelligence, and automation.

WORK EXPERIENCE:

Wipro

Senior Software Engineer

09/2024 – Present

- Designed and implemented data pipelines using **Python**, **pandas**, and **NumPy** for data preprocessing, EDA, and feature selection.
- Built classification and regression models using **scikit-learn**, **TensorFlow**, and **PyTorch**, with metrics-driven evaluation for production readiness.
- Automated end-to-end ML workflows using **Kubeflow** and **MLflow**, reducing model deployment time by 30%.
- Deployed containerized models to **Kubernetes** on **AWS SageMaker** and **Azure ML**, enabling cloud-native inference at scale.
- Developed custom model monitoring tools using **Prometheus** and **Grafana** to detect drift and performance anomalies.
- Integrated **DVC** and **MLflow** for model versioning and experiment tracking across teams.
- Integrated **GenAI features** into internal dashboards to support NLP-based alert querying and remediation suggestion generation.
- Used **Hugging Face Transformers** to fine-tune small-scale LLMs for internal data summarization and ticket classification tasks.
- Led proof-of-concept around **agentic AI** where LLM-powered agents managed infrastructure scaling and performed automated incident triage.
- Leveraged **Moogsoft**, **Splunk ITSI** and **Dynatrace** for AIOps-driven predictive monitoring and incident correlation.
- Delivered workshops on prompt engineering and safe LLM use within enterprise DevOps environments.
- Built lightweight **Generative AI** tools using **OpenAI's GPT APIs** for:
 - Generating automated root-cause analysis from logs
 - Producing summaries of system alerts and incidents

Ganeshmadake32@gmail.com

SKILLS:

Programming & Scripting:

- Python, Bash, YAML, SQL.

AI/ML & Deep Learning Frameworks:

- Scikit-learn, TensorFlow, PyTorch, Keras.
- Hugging Face Transformers, OpenAI API, LangChain.

MLOps & Model Lifecycle Management:

- MLflow, Kubeflow, DVC, TensorBoard.
- SageMaker, Azure ML.

Generative AI & LLM Tooling:

- OpenAI GPT APIs, Hugging Face, LangChain, LlamaIndex, Transformers
- Prompt Engineering, Few-shot Learning, RAG (Retrieval-Augmented Generation)

Agentic AI / AI Agents:

- LangChain Agents
- CrewAI
- AutoGen
- DSPy
- N8n

- Creating smart assistants to guide DevOps teams on infra best practices

Projects:

- **LLM-Aided Monitoring Assistant (POC):** Built a GPT-4-powered chatbot that summarizes real-time alerts and recommends remediation using past incident data.
- **MLOps Agent Framework:** Designed an agentic AI prototype that auto-triggers retraining and scaling based on model metrics and incoming data volumes.
- **GenAI-powered Log Insight Tool:** Created a tool using OpenAI API to summarize and classify server logs, reducing triage time by 40%.

Accenture Ltd

Senior Technology Analyst

04/2024 – 09/2024

- Designed and implemented comprehensive CI/CD pipelines using Azure DevOps and GitLab, enabling efficient build, test, and deployment processes.
- Managed source control with GIT, overseeing access levels, log monitoring, and conflict resolution to maintain a stable codebase.
- Implemented containerization using Docker and Kubernetes, improving application portability, deployment speed, and resource utilization.
- Developed and maintained automation scripts using Python, enhancing operational efficiency, and reducing manual errors.
- Automated infrastructure provisioning and configuration using Terraform, reducing manual configuration efforts and errors.
- Managed and secured sensitive information using Azure Key Vault, ensuring compliance with security best practices.
- Utilized Linux (RHEL, Ubuntu, CentOS) for server management and automation tasks.
- Monitored systems proactively using Prometheus and Grafana, Splunk and implemented alerting mechanisms to identify and address potential issues before they impact production.
- Leveraged EVA (Enterprise Vault Archiving) to manage and archive critical data securely and efficiently.

Infosys Ltd

Technology Analyst

04/2021 – 02/2024

Ashore Systems Pvt. Ltd

Linux Administrator

03/2020 – 03/2021

Evolve Technologies & Service Pvt. Ltd

Trouble Ticket & WO Admin

12/2017 – 02/2020

Data Engineering & Analytics:

- Pandas, NumPy, SQLAlchemy, Matplotlib, Seaborn.

Model Deployment & Serving:

- Docker, Kubernetes, FastAPI, Flask

Cloud Platforms:

- AWS
- Azure

Infrastructure as Code (IaC) & Automation:

- Terraform, Ansible, Azure DevOps, GitLab CI/CD

Monitoring, Logging & AIOps Tools:

- Prometheus, Grafana, Moogsoft, Splunk ITSI, Dynatrace

Version Control & DevOps Practices:

- Git, GitHub, GitLab, Bitbucket
- CI/CD Pipelines, Agile, Scrum, Kanban

Security & Secrets Management:

- Azure Key Vault, HashiCorp Vault, IAM

EDUCATION:

B.E in Electronics and Telecommunication
Savitribai Phule, Pune university,
Pune, India.

Languages:

- English
- Hindi
- Marathi
