

Wayal Pankaj Eknathrao

Gen AI Developer

Pune, India | +91 8433857709 | pankajwayal777@gmail.com |

SUMMARY

- As I specialize in Gen AI, Agentic AI, LLMs, Graph RAG, and NLP to solve complex business problems. With 8+ years of unified experience in data science, machine learning, and Gen AI, I bring expertise in data and AI and, revenue optimization, and sales forecasting.
- I have tackled challenges like applying Generative AI, AI Agent and RAG for automated document processing, creating LLM-based knowledge retrieval platforms, and leveraging LLMs for advanced customer sentiment analysis. Additionally, I have developed Agent and RAG-based chatbots and recommendation systems, predicted startup funding trends, and built financial risk classification systems I have also led customer-focused initiatives, such as NPS projects, the Wizards program for customer retention, and BTL activities to enhance customer engagement.

SKILLS

- **Programming & Data Handling:** Python, SQL, Pandas NumPy, Plotly, PowerBI
- **Cloud & DevOps:** Azure, AWS, Databricks, Github, Docker, Kubernetes,
- **Machine Learning & AI:** Scikit-Learn, TensorFlow, Pytorch, NLP, Computer Vision
- **Generative AI & LLM Engineering:** LoRa, QLoRa, PEFT, Hugging Face, LangChain, Llama, OpenAI APIs.
- **Vector Databases & RAG:** Milvus, Pinecone, Azure AI Search
- **Business-Centric AI:** Recommendation Systems, AI-powered Analytics, Conversational AI
- **NLP & Text Analytics:** NLTK, SpaCy, re
- **APIs & Web Frameworks:** Flask API, FastAPI

CERTIFICATIONS & ACHIEVEMENTS

Statistics & Data Science:

- Data Analytics with Python – IIT Roorkee (NPTEL)
- Python for Data Science – IIT Madras (NPTEL)
- Foundation of Data Science – IIM Bangalore (Swayam)
- Predictive Analytics – IIM Bangalore (Swayam)

Machine Learning & AI:

- Generative AI & LLM -IIM Bangalore (Swayam)
- Deep Learning -IIT Ropar (NPTEL)
- Introduction to Machine Learning – IIT Madras (NPTEL)
- Business Intelligence and Analytics – IIT Madras (NPTEL)

Cloud & Project Management:

- Microsoft Certified: Azure AI Engineer Associate (AZ-102)
- Microsoft Certified: DP-900 Azure Data Fundamentals

EXPERIENCE

9Nexus Private Ltd. (Client: Cognizant India Pvt Ltd → GSK Pharmaceuticals)

Gen AI Developer

Feb 25 –present

Key Qualifications & Responsibilities & Key Achievement:

- Build **Agentic AI assistant** using Langchain StructuredChatAgent to automate financial insight generation **for GSK's Global Supply Chain team.**
- Integrate SQL Tool and Python Tool and Custom Tools with Intent classification and **Validation Agent** and dynamic tool routing.
- Design and deployed via FASTAPI-Async with Kong Token Auth and Azure Databricks and Azure OpenAI-GPT-4 for real time and secure response.
- Optimized performance using LRU cache and Query rewriting and Query normalization and Prompt enhancement.
- Impact:
- **Reduced manual effort by 60%** and latency by 45%
- Tech Stack: LangChain, LangGraph, Github, FastAPI-Async, SQL Agent, Python Tool, KONG, Azure Databricks, Docker, Kubernetes, Azure OpenAI-GPT-4,

Skillslash Pvt Ltd**Gen AI Associate/Intern-Data Science**

Feb 24 – Jan 25

Key Qualifications & Responsibilities & Key Achievement:

- **Sales Recommendation Engine using RAG for Product Personalisation**
- Developed a Retrieval-Augmented Generation (RAG)-based recommendation system for personalized product suggestions and AI-driven insights, integrating real-time retrieval for enhanced user engagement.
- Impact:
- 30% increase in customer engagement, 20% boost in conversions.
- 40% faster query resolution, leading to 15% higher repeat purchases.
- Tech Stack: Hugging Face, LangChain, Milvus, FastAPI, Flask, Docker, Kubernetes, Azure
- **Llama 3 based AI chatbot for Hospitality using LoRA**
- Built an AI chatbot using Llama 3 and LoRa for automated concierge services and personalized travel recommendations, ensuring real-time customer assistance
- Impact:
- 35% higher customer satisfaction, reduced operational costs, and enhanced engagement through AI-driven automation.
- Tech Stack: Llama 3, LoRa, Fast API, Flask, Docker, Hugging Face, Azure, LangChain

Samast Technologies Pvt Ltd- Magicpin- Ecommerce**Business/Data Analyst-Data Science**

Nov 2022 – Sep 2023

- **Sales Forecasting & Sector-Wise Funding Prediction:** Developed predictive models to analyze sales trends and funding allocation across sectors, improving financial planning and decision-making.
- **Churn Management:** Built machine learning models to predict customer churn, enabling proactive retention strategies and reducing attrition rates.
- **Data Insights & Advanced Analytics:** Leveraged SQL, Python, and machine learning to drive data-driven strategies, boosting revenue by 25% and optimizing business performance.
- **Visualization & Decision Support:** Designed interactive dashboards in Power BI , improving insights and campaign success by 30%
- Tools: SQL, Python, Power BI, Machine Learning, Statistical Models, Time Series Models,Azure

HDFC Life Pvt Ltd – BFSI Sector**Associate Circle Head-Analytics**

Feb 2020 – July 2022

- Developed and executed a micro-market strategy that resulted in a 30% increase in circle revenue and expanded distribution channels, driving significant business growth.
- **Reduced partner churn from 28% to 8%** by strengthening relationships, implementing engagement programs, and enhancing partner collaboration.
- Improved the Net Promoter Score (NPS) by 15%, boosting customer loyalty and enhancing overall satisfaction.
- Leveraged time series forecasting to predict sales trends and create accurate financial objectives, leading to more informed business decisions.
- Implemented data-driven strategies to streamline sales processes, identify key market trends, and enhance customer satisfaction through advanced CRM tools.
- Tools: SQL, Python, Power BI, Statistical Models, Excel, Machine Learning and Time Series Models

OYO Hotels and Homes Pvt Lid- Ecommerce**Revenue Manager-Analytics**

Sep 2016 – Jan 2020

- **Churn Management:** Reduced partner churn from 35% to 10% by strengthening relationships and enhancing engagement programs.
- **Improved Net Promoter Score:** Boosted NPS by 20% over 18 months through targeted customer loyalty initiatives.
- **Customer Escalation Management:** Effectively managed customer escalations, leading to a 10-point improvement in overall satisfaction.
- **Customer Satisfaction:** Reduced unhappy customers from 20% to around 5% through delight initiatives and the "Wizards" program.
- **Data-Driven Strategies:** Leveraged CRM insights to optimize sales processes, increasing customer satisfaction by 30%.

- Tools: SQL, Python, Power BI, Statistical Models, Excel, Time Series Model

Senior Executive, Data & Strategy Analytics -Ecommerce
2016 Askmegrocery.com

Sep 2015- Aug

➤ **Recent Capstone Project and Research Initiative:**

- **1. AI-Powered Hospitality Chatbot Using LLaMA 3 & LoRA**
- Description: Developed a LLaMA 3-based AI chatbot for the hospitality industry using Low-Rank Adaptation (LoRA). The chatbot provides real-time customer support, handling inquiries efficiently with context-aware responses. It is fine-tuned with domain-specific data to enhance accuracy and responsiveness. Deployed on Azure for scalability and reliability.
- Technologies: LLaMA 3, LoRA, LangChain, Python, Azure, Flask, NLP
- **2. Customer Sentiment Analysis with LLM for E-Commerce**
- Leveraged Large Language Models (LLMs) like GPT-4 to analyze customer feedback and reviews from multiple e-commerce channels, providing actionable insights to improve customer engagement and identify areas for operational improvements. Used NLP techniques and tools like Hugging Face and TextBlob to classify sentiment and emotions, uncovering trends in product satisfaction and customer experiences. Delivered data-driven solutions that helped enhance product offerings, drive customer retention, and support strategic decision-making across marketing, support, and product development teams.
- Technologies: LLM (GPT-4), Hugging Face, Python, TextBlob, Pandas, NLP, Seaborn, Matplotlib
- **3.Data Balancing with Insurance Claim Fraud Detection using Gen AI**
- Description: Implemented a data balancing solution for insurance claim fraud detection by generating synthetic data with generative AI models. Enhanced model performance by addressing data imbalance issues common in fraud detection. Applied machine learning algorithms for accurate and reliable fraud prediction.
- Tools & Techniques: Python, TensorFlow, Scikit-learn, Pandas, GANs, Matplotlib
- **4. Predict Startup Funding Trends**
- Description: Developed a predictive model to forecast startup funding trends for 2025 and 2026 based on historical data from 2023 and 2024. The model leverages both machine learning and deep learning techniques to capture patterns and predict funding amounts across 46 sectors.
- Tools & Techniques: XGBoost, Random Forest, LSTM, Python, Azure, Flask, Pandas, Scikit-learn, TensorFlow.
- **5.Sales Recommendation Engine with RAG for Product Personalization**
- Description: Built a recommendation engine leveraging Retrieval-Augmented Generation (RAG) to provide personalized product suggestions and dynamic explanations based on customer interaction history. Integrated real-time retrieval of product descriptions, offers, and benefits to enhance personalization and user satisfaction.
- Tools & Techniques: Python, Hugging Face Transformers, Lang Chain, Pinecone, Scikit-Learn, Data Analytics

EDUCATION

Data Science Domain Specialization-NPTEL & IIT Madras-

Feb 2024

NPTEL and IIT Madras -Govt Credit Based Program

Skillslash Academy -Advance Data Science and AI Program

Mar 2023 - Jan 2024

11Month- Mumbai, India

Master of Business Administration, Marketing Management

Aug 2013 - Apr 2015

SP Pune University, Pune, India

Bachelor of Technology, Food Engineering

Aug 2008 - May 2012

Aurangabad, India
