

JOEMON JESUDAS

Phone : +91-9846040677

Email : jomonjesudas@gmail.com

Profile : linkedin.com/in/joemon-jesudas

SKILLS

Primary Skills : Python, SQL, HTML

Secondary Skills : Azure Cloud Services, Postgresql, Docker, Kubernetes, Mlflow, Grafana, Pyspark, Git, Apache Airflow, Linux, DVC, Power BI & Azure Data lake storage

PROFESSIONAL EXPERIENCE

Allianz Services

May 2022 - Present

ML Engineer/Data Engineer

- Developed and deployed machine learning model for a Insurance claims handling client, resulting in saving more than £5 million pounds.
- Hands-on with building traditional machine learning models.
- Hands-on with building model monitoring dashboards in Grafana using advanced SQL queries.
- Hands-on with implementing pyspark script for extracting and transforming data from Azure Datalake.
- Experience in building web based applications using streamlit and Angular.js
- Hands-on experience in creating cron jobs for extracting data from a data lake and deploying them in a Kubernetes cluster using Helm charts.
- Containerized several applications using Docker, simplifying the deployment process and improving environment consistency.
- Hands-on with versioning the data using DVC.
- Implemented CI/CD pipelines with GitHub Actions, automating the build, test, and deployment processes, leading to faster delivery cycles.
- Experience working in projects using Agile Methodologies.
- Experience using project management tools like Jira.
- Led a knowledge-sharing session on data engineering concepts and practices, promoting a culture of learning and collaboration within the team.

Orglens

Dec 2021 - Mar 2022

Social Network Analysis - Internship

- Social Network Analysis: Conducted social network analysis to identify key influencers, community structures, and information flow within networks.
- Network Visualization: Created visual representations of social networks using NetworkX, to illustrate complex relationships and structures.
- Data Integration: Integrated data from various sources (social media platforms, communication logs, etc...) to perform comprehensive social network analysis.

Cognizant Technology Solutions

Dec 2018 - May 2020

Programmer Analyst

- Worked in SAP Security. It Includes providing user access, password reset, alert monitoring, clearing heap memory of the server and health check.
 - Provide live chat support for customers.
 - Streamlined customer support processes through ticketing systems, handling over 120 tickets per month and improving issue resolution efficiency by 40%, boosting overall customer retention rates by 15%

EDUCATION & ACADAMICS

Masters in Computer Science

Rajagiri College of Social Sciences(Autonomous)
MG University.

2020 - 2022

CGPA : 3.96/5.0 (B+)

Bachelors in Computer Application

Kristu Jyoti College of Management and Technology
MG University.

2015 - 2018

CCPA : 7.62/10.0 (B)

AWARDS AND CERTIFICATIONS

1. Certified in Azure Fundamentals (Microsoft) - AZ900
2. Certification in MLOps - Cloudxlabs
3. Certification in AIOps - iNeuron
4. Allianz Delivery Excellence Champion - 2023
5. Allianz Best Performer Award, April - 2023
6. Allianz Best Performer Award July - 2023
7. Allianz Best Performer Award, Dec - 2022.
